

XT *DigiGlide*

NEXT **Generation** **Hand CPM**

Re-Introducing the Next Generation Hand CPM Device

- Full composite fist capability
- Intrinsic minus capability
- Powerful, strong, reliable
- Light weight and easy to apply
- Patient-friendly application

The new 2014 XT Digi-Glide Hand CPM device from Kaiser Medical, Inc. is the latest version to be introduced for the rehabilitation of the hand.

This device provides the patient, therapist and doctor with the ability to achieve a complete composite fist, intrinsic minus motion, and many other adaptations for the motions best suited to the patient's particular needs.
